

## Sample Photo/Recording Releases

1. *Wording to be added to program registration for children and youth in churches and schools and other organizations:*

"I understand that photos, videos, or other recordings of my child and others may be taken during \_\_\_\_\_ and other church/school/organization events. I consent to the use of my child's image or voice in promotional materials such as the church/school/organization website and other social media outlets. I understand that my child's identifying information will not be provided unless I give express permission at a later time for a particular image or recording."

2. *Wording to be added to service bulletin if worship services are being recorded or live-streamed, and it is not practical to get a signed release from the parents or guardians of minors in attendance, the following language should be included in the service bulletin (as appropriate to the circumstances):*

"Notice to Parents: This service is being livestreamed and/or recorded for online viewing. By allowing your child to participate in the service, you are consenting to the use of your child's image and voice for such purposes. No identifying information will be provided without your express consent."

*If the service or activity is one for which no bulletin is provided, then an appropriate Notice to Parents should be posted in a conspicuous place that will be seen by parents as they arrive with their children. The notice may also be included in advance publicity for the service or activity.*
